Refraction: Snell's law

A ray entering the denser medium bends toward the normal

$n_1 = 1.00$ (air)

$n_1 \sin\theta_1 = n_2 \sin\theta_2$

$\sin\theta_2 = \sin 50^\circ / 1.50 = 0.511$

$\theta_2 = 30.7^\circ < \theta_1 = 50^\circ$

$n_2 > n_1$: the ray bends toward the normal.

$n_2 = 1.50$ (glass)
